This publication lists the research activity of the Faculty of Social Sciences and Education of the University of Cyprus undertaken in the years 2008-2010. This book presents information on each member of the Faculty’s academic staff who is directly or indirectly involved in research, such as membership in professional societies, international organisations or editorial boards, and participation in research programmes. The internal research programmes which are listed in this publication have been approved by the Senate of the University of Cyprus.

Publications make up a sizeable part of the book and only published books, chapters and articles are included, while publications “in press” or “forthcoming” are not. The number of journal publications and conference proceedings is limited to a selection of best ten publications by each member of the academic staff.

Members of the academic staff are listed in alphabetic order within departments and the information outlined in all research profiles is based on electronic data received directly from members of the academic staff.

The book contains three appendices:

- Appendix I lists all the doctoral titles awarded by the Faculty of Social Sciences and Education in alphabetic order within the period 2008-2010.
- Appendix II presents a list of abbreviated terms listed in this publication.
- Appendix III lists an index of the academic staff of the Faculty of Social Sciences and Education in alphabetic order by surname.

For more information on the research activity of the Faculty of Social Sciences and Education, visit the University of Cyprus website at http://www.ucy.ac.cy/goto/sosciedu/en-US/Home.aspx.
Apart from offering high quality teaching, the primary focus of the Faculty of Social Sciences and Education is to conduct excellent research.

Our Faculty’s research programmes reflect the expertise, creativity and innovation of the academic staff who set their own research agenda and who cooperate with their colleagues internationally. The work is produced by a variety of research programmes in various fields, both on the theoretical and the applied levels. Our researchers take extra care so that their results have an impact on the local society. In recent years, many research grants have been secured by members of our Faculty.

The Faculty of Social Sciences and Education consists of the following four Departments:

1. Department of Education
2. Department of Law
3. Department of Psychology
4. Department of Social and Political Sciences

Research is a major goal and a priority in all departments.

The research interests of the Department of Education cover a broad spectrum of disciplines, including topics related to history, philosophy and sociology of education, curriculum studies and the didactics of specific domains.

The Department of Law is a relatively recent addition to the University. Its members have an established research record in topics like general principles of private law, history and theory of private law, contract law, European private law, comparative private and public law, domestic and European public and constitutional law and international law.

The Department of Psychology promotes research in its field, and aims to be in touch with the most recent advances in the different areas. The research activities of the department cover a wide range of topics in the areas of educational, cognitive, social and developmental psychology.

Research at the Department of Social and Political Sciences covers a wide range of topics related to Cypriot society from an international perspective. The research activities of the department include the Cyprus problem, Cypriot economic culture, the European Union and European co-operation and increasing prospects of placement of young people in the labour market.
Faculty research is disseminated through many activities, including publications of books and articles in high quality, peer review international Journals, the organization and participation in high calibre conferences and the publication of conference proceedings.

This publication highlights some samples of the innovative basic and applied research that was carried out in this Faculty during the period of 2008-2010.

The mission of the Department of Education is, firstly, the promotion of the pedagogical sciences and, secondly, the pre-service and in-service training of teachers. With regards to the first part of its mission, the Department has developed two undergraduate programmes leading to degrees in pre-primary and primary education. It has also developed six graduate programmes which are currently running and which lead to Master’s and Ph.D. degrees. Furthermore, two additional graduate programmes have been approved and will soon be inviting applications. With reference to the second part of its mission, in 2007 the Department began to undertake the pre-service education of prospective teachers of Secondary Education.

Owing to the great number of students enrolled in the Department’s programmes of study, all faculty members have taken on increased teaching and management responsibilities. Nevertheless, this has neither hindered their research and publication activities, either individually or in cooperation with colleagues from Cyprus and foreign universities; nor their participation in many educational conferences abroad and the organization of conferences in Cyprus. More specifically, during the period under review, faculty members in our Department collaborated with colleagues at universities in Greece, the U.K., Germany, Italy, France, Finland, Switzerland, the U.S.A., Canada and other countries. They have published books, chapters in collective volumes and research papers in top journals as well as in conference proceedings. At the same time, they were actively engaged in the educational, cultural, political and social life of the island.

Given the multi-disciplinary character of the Department, the research interests of the faculty members cover a wide spectrum of areas, including the history, philosophy, management, and sociology of education, inclusive education, multiple fields in curriculum studies, and the didactics of special areas such as physics, maths, language, sports pedagogy, environmental studies and religious education.

Over 2000 publications have been produced by the Department during the last three years.

During the period under review, 18 Ph.D. degrees were awarded to students who successfully completed their graduate programmes.

Charalambos Papacharalambous
Assistant Professor

Tatiana-Eleni Synodinou
Assistant Professor
The Department of Law was established in 2006. The academic year 2008-2009 is significant for the Department because this is the year its first undergraduates were admitted. In the summer of 2012 these first LL.B students will graduate.

The mission of the Department is not only to provide its students with high quality education, but to undertake research that will benefit the law fraternity in Cyprus and the broader European area. The Department is at the forefront of the research into Cyprus Law and its development in the European context. The Law Studies programme offered by the Department aims to encourage critical legal thought that combines theory and specialist knowledge with an applied approach.

Research is another major aim of the Department and already the Department is very well represented in international, European and local research projects, especially in the fields of Criminal Sciences, International Law, European Law, Private Law and Private International Law.

The Department’s contribution to Cypriot society is also noteworthy and it is expected to add significantly to the University’s social contribution. The Department of Law has a significant contribution to make to the harmony and prosperity of the local community.

Among the Department’s immediate goals are: to increase the size of its academic staff, to admit more students introduce post-graduate programmes, and become autonomous as soon as possible.

The Department of Psychology, albeit relatively young (founded in 2004), is a dynamic department with high academic and research standards. Our vision is to contribute to the growth of scientific and scholarly research in the field of Psychology and our mission is to provide a solid academic and research education to our students. Our faculty come from varied academic and research traditions representing the diversity within the field of Psychology. Faculty in the Department of Psychology collaborate with scholars at research centres abroad and run numerous research projects in many different areas including:

- Emotion, Anxiety, and Mood Disorders
- Behavioral Disorders
- Cognitive Science and Neurocognitive Disorders
- Learning, Language, and Developmental Disabilities
- Social Interaction, Social Development, Bullying
- Perception and Spatial Orientation
- Memory and Attention
- Clinical Neuropsychology
- Developmental Psychology

Faculty projects are funded by a number of organizations including the European Commission, the Cyprus Research Promotion Foundation, the Foundation for the Advancement of Scholarship in Canada, the European Research Council, the International Research Association, and the National Institute of Child Health and Human Development (National Institutes of Health, USA). In addition, our faculty serve on several prestigious journal editorial bodies and scientific society boards. Through our international contacts and collaborations we have been able to organize a number of research symposia, and have invited guest lectures to Cyprus to benefit both our students and the scientific community in Cyprus.

Overall, the Psychology Department emphasizes a rigorous, scientific approach to the understanding of human behaviour. Our students have many opportunities to participate in research projects conducted by our faculty, including projects taking place in the four labs of the Department: the Experimental Psychology Laboratory, the Neurocognitive Research Laboratory, the Psychophysiology Laboratory, and the Social Developmental Psychology Laboratory. Additionally, students can participate in research activities conducted at the Center for Applied Neuroscience, which is the newly established research centre of the School of Social Sciences and Education and is led by faculty in the Department of Psychology.

Studies in Psychology is one of the most popular fields of study at the University of Cyprus. We offer an undergraduate degree, three graduate degree programmes, and two doctoral degrees.
The three Master’s programmes provide students with a broad understanding of the scientific foundations of psychology, as well as direct experience in research methods and clinical practice. Two of the graduate programmes in Social Developmental and Cognitive Educational Psychology lead to a Master of Arts in Psychology (Theoretical); the third results in a Master of Arts in School Psychology (Applied). The Department offers two Ph.D. programs: Doctor of Philosophy in Psychology and Doctor of Philosophy in Clinical Psychology. The doctoral degrees aim for and focus on new knowledge in the field of psychology; therefore they are research intensive, culminating in the doctoral dissertation. In addition to the doctoral dissertation, the Ph.D. in Clinical Psychology prepares students for clinical practice in accordance with European standards and the Cyprus law for professional psychologists.
