Miriam Garcia

Landscape's for climate emergency

LECTURE

ARCHITECTURE LECTURE SERIES FALL SEMESTER 2019

19 December
Thursday

18:30 - 19:30

68 Ledras Street, Old City Nicosia, 1678, Ground Floor, Department of Architecture

Miriam Garcia

PhD in Architecture, Landscape Architect, Urban Planner, Founder and Director of LANDLAB, landscapes laboratory, office based in Barcelona, Spain. Her professional expertise is a combination of the skills acquired while working in a regional government institution coupled with research and private practice. Her practice focuses on urban planning and design from the perspective of landscape and resilience, with projects awarded both nationally and internationally, like the First Prize in the XII Biennial of Spanish Architecture and Urbanism. Complementary, her research is focused on landscape infrastructure as a tool to address pressing ecological and social challenges affecting fragile areas exposed to the effects of climate change.
