

Areas	Faculty Members	Programme
<i>Focal Adhesions as a Target for the Development of new Cancer Treatments</i>	<u>Dr. Paris Skourides</u>	<u>Master in Biomedical Sciences</u>
<i>Mechanical and Molecular Cross talk during Embryonic Development</i>		
<i>Genetic and Mechanistic Investigation of Ciliopathies</i>		
<i>Host-Pathogene Interaction, Cancer Causing Viruses</i>	<u>Dr. Katerina Strati</u>	<u>Master in Biomedical Sciences</u>
<i>Computational Biology and Bioinformatics: selective autophagy</i> <i>Computational Biology and Bioinformatics: prediction of structural and functional properties of the ALADIN nucleoporin</i>	<u>Dr. Vasilis Promponas</u>	<u>Master in Biomedical Sciences</u>
<i>Function of Epigenetic Modifications</i>	<u>Dr. Antonis Kirmizis</u>	<u>Master in Biomedical Sciences</u>
<i>Molecular Virology of HIV-1</i>	<u>Dr. Leondios Kostrikis</u>	<u>Master in Biomedical Sciences</u>
<i>Stem Cell, Development and cancer in Drosophila</i>	<u>Dr. Chrysoula Pitsouli</u>	<u>Master in Biomedical Sciences</u>
<i>Developmental Biology and Stem cells</i>	<u>Dr. Pantelis Georgiades</u>	<u>Master in Biomedical Sciences</u>
<i>In silico and molecular analysis of whole</i>	<u>Dr. Constantinos Deltas</u>	<u>Master in Biomedical Sciences</u>
