<th>Programme</th>
</tr>
</thead>
<tbody>
<tr>
<td>-Mechanical and Molecular Cross talk during vertebrate embryonic development - FAK as a target for the generation of antimetastatic drugs - Biology of ciliated Epithelia</td>
<td>Dr. Paris Skourides</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>-Human intestinal Microbiota and its Metabolic profiling -Engineering and exploiting a Human gut-on-chip</td>
<td>Dr. Yiorgos Apidianakis</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>Functional and therapeutic implications of histone N-terminal acetylation</td>
<td>Dr. Antonis Kirmizis</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>Developmental and Stem Cell Biology</td>
<td>Dr. Pantelis Georgiades</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>HIV-1 Transmission and Pathogenesis</td>
<td>Dr. Leondios Kostrikis</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>Host-pathogen interactions, cancer causing viruses</td>
<td>Dr. Katerina Strati</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
<tr>
<td>Biobanking and studies on inherited diseases</td>
<td>Dr. Constantinos Deltas</td>
<td>Ph.D. in Biomedical Sciences</td>
</tr>
</tbody>
