

November 2016

SUMMARY

- In November 2016, the economic sentiment in Cyprus edged up as the Economic Sentiment Indicator (ESI-CypERC) increased by 0.3 points compared to October because of improvements in retail trade, industry and consumer confidence.
- The Retail Trade Confidence Indicator increased because of firms' more optimistic views regarding their sales over the next three months.
- The increase in the Industry Confidence Indicator was mainly driven by upward revisions in firms' future production plans and more favourable assessments of the stocks of finished products.
- The Consumer Confidence Indicator increased as a result of consumers' more optimistic responses regarding their future financial situation and the future economic conditions in Cyprus, in general; a less negative attitude towards savings also contributed to the pickup of the Indicator.
- The Construction Confidence Indicator declined because of firms' less favourable assessments of their future employment plans.
- The Services Confidence Indicator fell due to more pessimistic views regarding firms' future turnover.

Note: The weights used in the calculation of the Economic Sentiment Indicator constructed by the Economics Research Centre (ESI CypERC) reflect the contribution of each sector to the GDP of Cyprus.

The Economics Research Centre of the University of Cyprus (CypERC) participates jointly with RAI Consultants Ltd in the Joint Harmonised European Union Programme for Business and Consumer Surveys. CypERC acknowledges funding from the European Commission and the Ministry of Finance for the conduct of the Business and Consumer Survey Project in Cyprus.

Notes:

¹ Positive responses refer to increase/improvement/ above normal/very or fairly likely, while the opposite holds for negative responses. Data are seasonally adjusted.

² The weights used in the calculation of the Economic Sentiment Indicator reflect the contribution of each sector to the GDP of Cyprus.

³ The calculation of the confidence (composite) indicator is described in http://ec.europa.eu/economy_finance/indicators/business_consumer_surveys/userguide_en.pdf.

⁴ The responses to this question are used in the calculation of the confidence (composite) indicator for each survey.

⁵ Following a suggestion by the European Commission, the responses to this question are not adjusted for seasonality.
